

HIVE & PLEATED BLINDS

OUR NEW HIVE & PLEATED COLLECTION IS HERE!

With over 170 fabrics to choose from, Hive & Pleated are a versatile, practical and stylish option for windows and doors. Choose from blackout, sheer or light filtering styles, as well as a wide range of fitting options, to create the perfect solution for the home.

Explore our brochure for more information on both Hive & Pleated blinds, control options, motorisation, recycled fabrics and more!

FEATURES & BENEFITS

The fabrics within this collection are not only aesthetically pleasing, they also boast a range of extra performance properties.

Solar reflective:

Both our Pleated and Hive fabrics have solar reflective properties, helping to reduce the temperature in warm and sunny rooms.

Blackout:

We offer a wide range of blackout fabrics, ideal for bedrooms and designed to help promote a better night's sleep. For enhanced blackout performance, selected fabrics are available with a foil insert.

Fire retardant:

We offer a wide range of fire-retardant fabrics, ideal for commercial and residential settings where added safety is required.

Anti-static:

Say goodbye to dusty blinds, our anti-static fabrics help repel dust, keeping blinds fresher for longer.

Moisture resistant:

Our moisture-resistant fabrics help prevent damp and mould, making them the perfect solution for kitchens and bathrooms.

Thermal Properties:

Our Hive fabrics offer thermal insulation and heat-blocking ratings up to A++, helping keep rooms cool in summer and warm in winter.

CONTROL OPTIONS

Our Hive and Pleated fabrics can be fitted with a variety of control options:

Freehang – Our standard free hanging blinds are a versatile choice, operated with a simple cord or tab, and can also be motorised for complete convenience.

Transition – Transition allows two fabric choices to be combined into one blind, pairing both privacy and light diffusion into one solution.

Trilite – Trilite control allows you to position the blind exactly where is required along the tension cords to diffuse the light, offering flexibility and convenience.

Shaped windows – Choose from our specialised manual or electric systems to cater for shaped windows, like roof blinds, roof lanterns, skylights and large shaped windows.

Perfect Fit – Perfect Fit and INTU blinds allow windows and doors to be operated with blinds in place, ideal for maintaining both shade and ventilation.

Conservatories – Keep conservatories cool and comfortable with solar reflective fabrics. Roof blinds can also be motorised with Somfy technology to increase convenience in the home.

Motorised – Provide effortless operation with market-leading Somfy motors throughout the range.

PLEATED BLINDS

Pleated blinds are crafted from a single piece of fabric, folded into crisp, concertina-like pleats. This design offers a sleek, compact structure with a very small stack size, making them ideal for a variety of window shapes.

Lightweight and flexible, they provide effective shading with a broad selection of fabrics and colours, suitable for everyday light control across most window types. They also have solar reflective properties help reduce heat and glare, ensuring comfort and style in any room.

WHY CHOOSE PLEATED?

- Our Pleated range includes 85 fabrics, with a wide range of patterns, plains and textures to choose from.
- Pleated blinds are a stylish and practical choice that's compact and sleek, and they can be made to fit shaped windows, including conservatory roofs.
- Solar reflective and sun shading fabrics can help reduce the temperature in warm and sunny rooms, like conservatories, garden rooms and rooms with large glass expanses, to create a comfortable year-round temperature.
- Electric options are available for conservatory roof blinds for a quick and convenient way to control shading levels.

SOFT BEIGE

HIVE BLINDS

Hive blinds use clever honeycomb cells to create an insulating barrier at windows, preventing cold air from entering and warm air from escaping. With both manual and electric control options available, Hive blinds are perfect for any room, including conservatories and large glass expanses.

WHY CHOOSE HIVE BLINDS?

- Our Hive range has 68 fabrics to choose from, with a wide range of stylish printed and plain designs available.
- Hive blinds are an energy efficient choice, helping to regulate the temperature thanks to clever honeycomb cells that create a barrier at the window and help stop cold air entering and warm air escaping. Each fabric has its own energy-efficiency rating, ranking its heat blocking, heat insulating and solar reflecting properties – all of our Hive fabrics are rated from A to A++.
- The delicate honeycomb fabric folds into a compact stack, with a clever design that sits discreetly above windows and doors for a streamlined, elegant look.
- Hive blinds can be made electric with Somfy motors, allowing effortless control of single or multiple blinds.

honeycomb design

HIVE BLACKOUT TAUPE

DID YOU KNOW

INTU® hive and pleated blinds can be fitted to windows and doors without drilling the frames.

INTU® MICRO SOLSTICE ANTHRACITE

INTU®

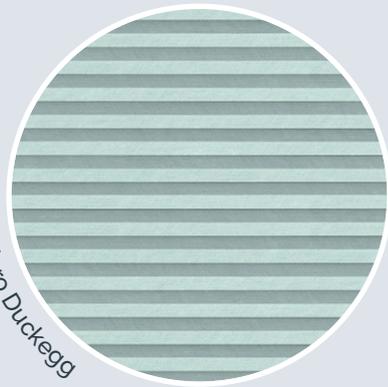

Our unique INTU® system is perfect for windows and doors, designed to fit seamlessly into the frame. The blinds move with your windows and doors, making them ideal for tilt-and-turn windows, patio doors, and conservatories.

All Hive and Pleated fabrics are fully compatible with INTU®. The INTU® system also enables you to fit Hive and Pleated blinds to windows and doors without drilling the frame.

INTU® MICRO

For compact spaces, we also offer the INTU® Micro system, with a smaller headrail and fabric pleat size, perfect for bi-folds and smaller windows.
